

Public Smoking

SUBJECT: Compliance, etc.

I attach a draft memo covering three items on which it would seem appropriate for you to communicate with the Regional Presidents.

I have also attached a number of memoranda relating to each subject - some would be enclosures with your memorandum and some are merely of interest as background.

On safety, I have included my notes from the two meetings I attended and this will fill you in further on the background for the survey of our facilities.

Regarding public smoking, Mike Miles has not yet signed the policy, so perhaps there is more discussion taking place internally. My draft assumes issuance of the policy in New York prior to your memo going out.
